All telephone lines are provisioned using BT's Wholesale Line Rental (WLR) and not using LLU providers.

Reseller Terms

Our reseller scheme is intended for customers to provide broadband and telephone line rental services to their customers and is not to be used solely for lines for their own internal use. A minimum of 2 connections provided to different properties and different end users is required. However, resellers may order telephone lines and broadband lines for their own use.

Payment Terms are monthly in advance by Direct Debit.

Resellers are expected to provide support to their own end users, and only the reseller should contact Web Tapestry in the event of technical escalations. The reseller is responsible for billing and collecting payments from their own end users.
